

## Current Outcomes of TMCC's MLT Program

9/26/2022

Current outcomes are measured by detailed competencies. Competencies are measured through student clinical competencies, mid-term and final exams. Feedback from students is gained through direct advising, informal assessment during class sessions, and formal student evaluation of instructors. Given assessment data and feedback from all courses, the TMCC MLT program has once again identified certification performance and graduation rates as a critical point of improvement that is necessary for the program. Without certification, students cannot be placed in a professional setting that requires this credential and this poses a significant area of development for the program. Even though students are not passing exams to attain certification, placement rates in areas related to their degree indicate that after graduation, students are filling a void in the regional labor market.
